Welcome, I'm **Hamad**! Let's talk about the future — plans, hopes, and predictions.

The final level of the journey: the future tense, predictions, comparisons, and real debate. Your child finishes here able to plan, predict, compare, and argue a point of view in English.

By the end of this level, your child can:

- Talk about future plans and predictions ("will", "going to")
- Describe what was happening while something else occurred
- Talk about rules, duties, and obligations
- Make comparisons ("even better", "which is better?")
- Discuss multitasking and daily habits
- Join a class debate and defend an opinion
- Compare cultures and traditions

Grammar

19 distinct structures across the level — future forms, past continuous, modals of obligation, and comparatives, capping off the full 7-level grammar progression.

NEW

Real scene illustrations

Every one of Level 6's 20 lessons now has an illustrated scene of Omar, Sara, Noor, Ziad and Hamad acting out that lesson's language -- the sentence sits in a caption box with the key words highlighted, an Arabic line underneath, and a play button to hear it.

NEW

A richer trial class

The free trial class now opens with a real-life question, includes a role-play dialogue from the level, a sentence-builder, graded grammar and vocabulary checks, and an open discussion moment -- not just vocabulary cards and buzzer games.

NEW

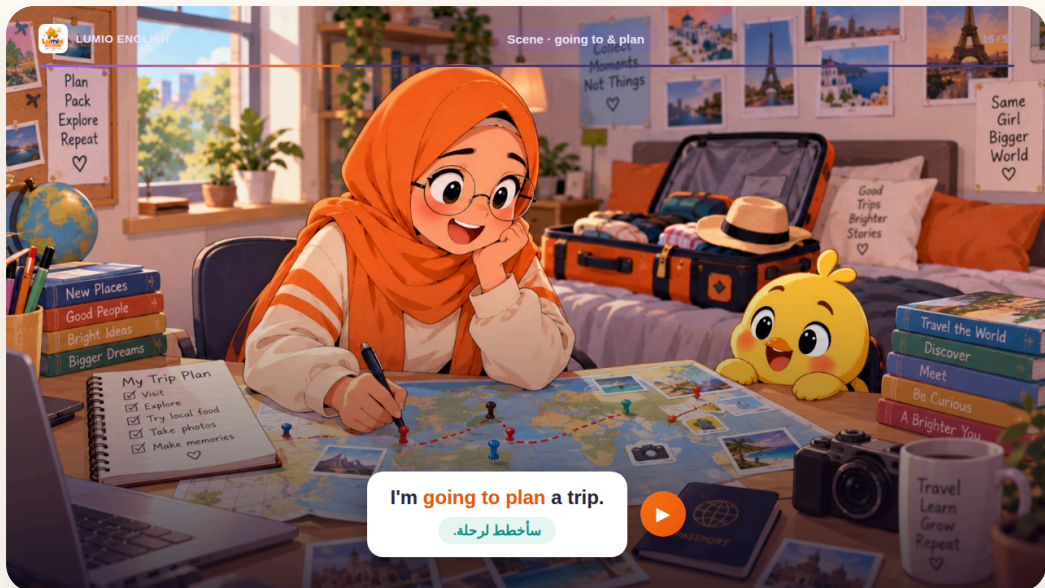

"Today I Learned" shows every sentence pattern

The recap at the end of each lesson now lists every sentence pattern used in that lesson, wherever it appeared -- not only one example.

NEW

A clear order for work between classes

The closing slide of every lesson gives the same steps in the same order: interactive homework first, then print the worksheet, writing sheet and flashcards, memorise the words, then play the bonus game.

Sample idioms your child will discover

Time will tell — We'll only know the answer in the future.

Cross your fingers — Hope for good luck.

The best is yet to come — Good things are still ahead of us.

A tip for home: the Hub isn't graded and has no quiz -- it's a calm space for your child to browse freely.

What it looks like to explore

Each theme opens as a full grid of picture cards -- every word shown with a real illustration, its Arabic meaning and a play button. Your child can browse the Looking Ahead Hub freely at any time, outside lesson time, and every card they tap plays the word aloud.

A real theme page from the Looking Ahead Hub, exactly as your child sees it

Tip: the Hub is the best place for a quick review before a class -- five minutes browsing the theme of the last lesson is worth more than re-reading a word list.

A printable page for every single lesson

Beyond the screen, every one of Level 6's 20 lessons comes with its own homework sheet and flashcard set, ready to print.

Who they're for, and why

Writing practice: your child writes three original sentences using that day's real grammar pattern -- for example, "going to" for future plans in Lesson 1. Fittingly for this level's own focus on looking ahead, this is where your child practices actually stating their own real plans and predictions, not just recognizing the future tense on screen.

Flashcards: every card shows the picture and English word on one side and the Arabic translation on the other. That means either parent can quiz their teen at home, even without speaking English themselves -- a quick flip-through is real, screen-free repetition that keeps vocabulary fresh alongside the grammar work.

Crystal Ball, this level's bonus game

A fortune-telling theme fitting Level 6's future-focused lessons, covering three kinds of visions: reading a word's meaning, judging a prediction, and seeing what happens next in a real conversation.

A vision round: two real chat lines, three possible things that happen next

How to play

1. **Read the crystal ball:** an Arabic word appears inside the glowing ball with three English options -- tap the correct meaning.
2. **Judge the prediction:** the ball shows a claimed Arabic-to-English match -- your child taps Correct or Wrong to judge it.
3. **A vision unfolds:** the ball "shows" two lines of a real conversation, and your child picks what really happens next from three options. Each correct answer across all three round types builds up a "power" meter that makes the ball glow brighter -- a fully-charged meter by the end means "the future looks bright!"
