Hi! I'm **Lumi**. Let's learn our very first English words together!

The very beginning of the journey: first greetings, the alphabet, numbers, colors, family, and everyday things -- all through play, songs, and repetition, no reading required.

By the end of this level, your child can:

- Say hello and goodbye, and their own name
- Recognize and say all 26 letters of the alphabet
- Count from 1 to 10
- Name basic colors
- Name family members and parts of the body
- Name common animals, foods, toys, and school things
- Say simple action words and how they feel

Sample vocabulary

hello مرحباً

apple تفاحة

three ٣

red أحمر

mom أمي

cat قطة

happy سعيد

jump يقفز

Grammar

Vocabulary and functional language only -- formal grammar begins in Level 3. At this age, the goal is confident first words and sounds, not sentence structure.

NEW Real scene illustrations

52 new scenes across this level show Lumi and the crew acting out each lesson's most important words in a real, connected moment -- the sentence the words appear in is shown right alongside the scene, with the key words highlighted.

NEW Themed lesson backgrounds

Every lesson now has its own illustrated backdrop matching its topic -- a cozy living room for "My Family", a sunny park for "Actions" -- instead of one flat background repeating across the entire level.

NEW Captions with Arabic on the scenes

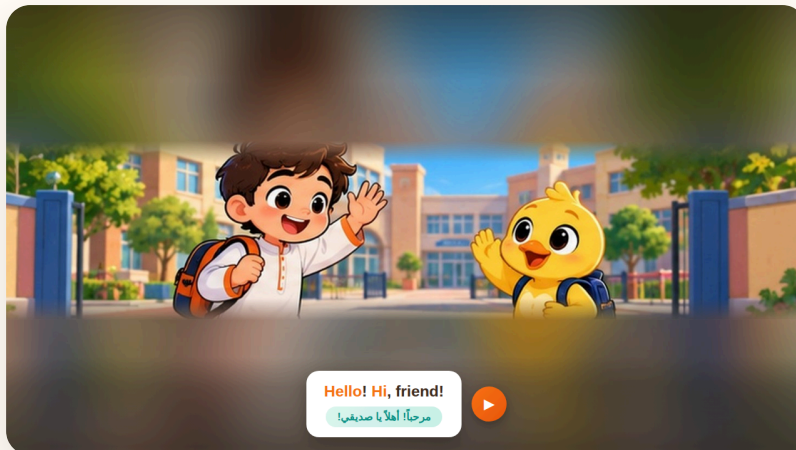

Scene sentences now sit in a clear white caption box instead of over the picture, and Lesson 1's greetings carry an Arabic line so the very first sentences are understood, not just repeated.

NEW "Today I Learned" shows every sentence pattern

The recap at the end of each lesson now lists every sentence pattern used in that lesson, wherever it appeared -- not only one example.

NEW A clear order for work between classes

The closing slide of every lesson gives the same steps in the same order: interactive homework first, then print the worksheet, writing sheet and flashcards, memorise the words, then play the bonus game. Lessons 5, 10, 15 and 20 also point to the new story part they unlock.

A real scene from "Hello!" -- the sentence now sits in a caption box with its Arabic line and a play button

A tip for home: the Hub isn't graded and has no quiz -- it's a calm space for your child to browse freely. A two-minute look before bed, or right after finishing homework, is still genuinely valuable practice.

What it looks like to explore

Each theme opens as a full grid of picture cards -- every word shown with a real illustration and its Arabic translation, ready for your child to tap and hear at their own pace.

A printable page for every single lesson

Beyond the screen, every one of Pre-A's 20 lessons comes with its own homework sheet and flashcard set, ready to print.

Who they're for, and why

Writing practice: at this age, before reading is even required, the task is simple and physical -- tracing and copying each word by hand, then drawing a picture for it. This builds letter formation and muscle memory long before your child is asked to write a sentence, and gives them a non-verbal way to show they understood a word.

Flashcards: every card shows the picture and English word on one side and the Arabic translation on the other. That means either parent can quiz their child at home, even without speaking English themselves -- a two-minute flip-through before bed is real, screen-free repetition that helps new words genuinely stick.

Lumi's Pocket, this level's bonus game

A letter-and-listening game built around the alphabet your child is currently learning: Lumi names a specific word, and your child finds it among two or three other words that start with the very same letter -- a real test of listening past the first sound, not just picture-matching.

Lumi asks for "nine" among three real N-words -- nose, nurse, and nine

How to play

1. Lumi shows a letter your child has already learned, and asks for one specific word that starts with it (for example, "Find 'nine!'"). Every picture shown genuinely starts with that same letter, so your child has to listen for the whole word, not just the first sound.
2. The letters used only ever come from lessons your child has already completed -- nothing shows up before it's been taught.
3. A few rounds also ask about a word or short sentence from the current lesson itself, mixing in vocabulary alongside the alphabet practice.
4. Each correct answer earns a star; by the final round, all six stars are filled in.
